DETAILED ACTION

Response to Amendment

Claims 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO (00/37049).

Response to Arguments

Applicant argues that the present invention comprises water-containing abrasive beads of controlled size.

The examiner contends that WO '049 teaches a method and/or composition in an aqueous solution comprising many of the components of the claimed invention. Particularly, WO '049 teach that said composition comprises a thickening agent such as hydroxypropyl methyl cellulose (pg. 8), which aids in agglomerating said composition. Furthermore, said composition is forced through a 0.22 micron filter which would lead the artisan of ordinary skill in the art to suggest that said solution encompasses applicants particle size which, according to the most comprehensive claim, may include "zero".

Therefore, it is the examiners position that WO '049 teaches applicant's method of cleaning by stating synonymous language such as disinfecting or **sterilizing** and includes applicant's size limitations absent a showing to the contrary.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1751

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
